Also sold separately for training purposes

The CSI kit uses a specialty blue light in conjunction with orange goggles to contrast proteins from bed bugs, blood, feces, caste skins and eggs.

- Cutting your inspection time by hours, use the blue-light with orange goggles to visualize latent signs and other physical infestation evidence.
- The blue LED flashlight: made of Aerospace-grade aluminum tempered Pyrex Lens; w/ Mil-Spec Type III hard-anodized; Shock tested with a drop test of ten feet.
- Rechargeable battery.
- Bed bug life cycle disc: actual eggs, nymphs and both female and male adults can be viewed at a glance providing an illustration of bed bug life cycle.
